

Finishing agent for natural leather

## Auxiliary agent for solvent-based coating

### 1. Features

By adding it to the coating liquid, it is possible to assist in finishing such as improving the compatibility between the fixing agent and leather, giving a natural finish, adjusting the gloss of the surface and improving the touch feeling.

There are also special chemicals that can be used alone to create distinctive finishes such as charred finish and pull-up finish.

### 2. Products

No.	Product name	Remarks
