

Finishing agent for natural leather

Water-based fixing agent 「BINDER」

1. Features

The water-based resin fixing agent "binder" includes emulsions of acrylic resin, urethane resin, latex, etc.

It can be selected according to various required characteristics such as permeability, coating, and gloss, and used in combination with an auxiliary agent.

2. Products

No.	Product name	Remarks
01	#125	Made of Urethane resin, Toughness performance
02	#215	Made of Urethane and Acrylic resin
03	2024E	Made of Acrylic resin, Toughness performance
04	AS-10	Made of Acrylic resin
05	AS-30	Made of Acrylic resin, Good hardness performance
06	E-66	Thickner
07	GF	High-gross performance
08	NA-10	Made of Latex, Toughness performance
09	PT-100	Made of Urethane resin, Softness performance
10	PT-211	Made of Urethane resin, Good performance
11	PT-213SE	Made of Urethane resin, Topughness and high-gross performance
12	PT-312	Made of Urethane resin
13	PT-333	Made of Urethane resin
14	PT-350	Made of Urethane resin, High-gross and hardness performance It is suitable for crashed stone finishing
15	R-308	Made of Acrylic resin (ultrafine perticles)
16	SP-3	Binder for high-class roll coating
17	Smooth UP	Made of high-class Acrylic resin
18	Tight binder UL-5	Made of Acrylic resin emulsion (ultrafine perticles)
19	Miracle HF/2	Made of Polyurethane resin emulsion It is able to re-coat on the lacquer coating layer with dilution it by acetone
